Subject Index to Volume 126

Thermal and fluid design

Premixing of steam explosions: a three-fluid model, W.H. Amarasooriya and T.G. Theofanous 126 (1991) 23
Triggering and propagation of steam explosions, S. Medhekar, M. Abolfadl and T.G. Theofanous 126 (1991) 41
An assessment of eight void fraction models, B. Chexal, J. Horowitz and G.S. Lellouche 126 (1991) 71
Intrinsically Safe and Economical Reactor (ISER), H. Wakabayashi, T. Yoshida and Y. Asahi 126 (1991) 89
Sensitivity analysis of an impedance void meter to the void distribution in annular flow: a theoretical study, H. Lemonnier, R. Nakach, C. Favreau and S. Selmer-Olsen 126 (1991) 105
Analysis of steam generator U-tube rupture and potentional depressurisation in LOBI-MOD2 facility, G.F. De Santi 126 (1991) 113
Analysis of multi-dimensional and countercurrent effects in a BWR loss-of-coolant accident, B.S. Shiralkar, G.E. Dix and Md. Alamgir 126 (1991) 127
Transient flow behavior for a helium-cooled ceramic breeder blanket, A.Y. Ying, A.R. Raffray and M.A. Abdou 126 (1991) 137
STGEN computer program methodology and application to the steam line break tests in the RD-12 steam generator, A. Sharon, M.A. Grolmes, C.S. Kim and J.C. Luxat 126 (1991) 151
Study on air ingress during an early stage of a primary pipe rupture accident of a high-temperature gas cooled reactor, M. Hishida and T. Takeda 126 (1991) 175
Predictions of rewetting process for a nuclear fuel rod using first-principles equations, Y.M. Ferng, C.C. Chieng and C. Pan 126 (1991) 189
A modal analysis of free-surface and internal gravity waves in a fast reactor hot pool, Y.L. Sinai 126 (1991) 207
Study of the mass transport model of boron injection for a natural circulation heating reactor, Zha Mei-Sheng, Nie Meng-Chen and Guo Wei-Ping 126 (1991) 221
Boron mixing in the lower plenum of a BWR, T.G. Theofanous and E.A. Shabana 126 (1991) 245
DNB experiments for high-conversion PWR core design, Y. Akiyama, K. Hori and S. Tsuda 126 (1991) 267
Development of an ultrasound velocity profile monitor, Y. Takeda 126 (1991) 277
Thermalhydraulics of helical type helium/helium-intermediate heat exchangers (IHX) for nuclear process heat applications of high temperature gas cooled reactors (HTR) – Fundamental research and large-scale tests, H.G. Groehn 126 (1991) 285
Phase distribution during gas–liquid flow through horizontal dividing junctions, J. Hart, P.J. Hamersma and J.M.H. Fortuin 126 (1991) 293
Beyond design basis accidents in spent fuel – Generic Issue 82, E.D. Throm 126 (1991) 333
Prediction of natural mixing in tightly packed 7-rod-bundles ($P/D = 1.10$), W. Zeggel and C. Monir 126 (1991) 361
Computation of heat transfer through a horizontally arranged HTR-fiber insulation, E. Achenbach 126 (1991) 379
Effect of interfacial drag force on the numerical stability of the two-step method in the two-fluid-model, J.Y. Lee and H.C. No 126 (1991) 427

Engineering mechanics

Evaluation of inelastic constitutive models under plasticity–creep interaction in multiaxial stress state, T. Inoue, F. Yoshida, N. Ohno, M. Kawai, Y. Niitsu and S. Imatani 126 (1991) 1
Evaluation of fatigue-creep life prediction methods in multiaxial stress state, T. Inoue, M. Okazaki, T. Igari, M. Sakane and S. Kishi 126 (1991) 13
A semi-analytical solution for deformation of elasto-viscoplastic circular thin plates under axisymmetric loading, F.G. Kollman and V. Simon 126 (1991) 51
Tearing stability analysis of an axial surface flaw in thick-walled pressure vessels, A. Zahoor and B.B. Ghassemi 126 (1991) 61

Nonlinear 3-D piping analysis under stochastic dynamic loads, Y.J. Park and M. Reich 126 (1991) 233
Iterative solution of the reduced eigenvalue problem, G. Sauer 126 (1991) 257
Transient thermal stresses in a composite hollow cylinder subjected to γ-ray heating, T. Goshima and K. Miyao 126 (1991) 413

Materials properties

Evaluation of inelastic constitutive models under plasticity–creep interaction in multiaxial stress state, T. Inoue, F. Yoshida, N. Ohno, M. Kawai, Y. Niitsu and S. Imatani 126 (1991) 1
Evaluation of fatigue-creep life prediction methods in multiaxial stress state, T. Inoue, M. Okazaki, T. Igari, M. Sakane and S. Kishi 126 (1991) 13

Mechanical design, component fabrication and testing

Tearing stability analysis of an axial surface flaw in thick-walled pressure vessels, A. Zahoor and B.B. Ghassemi 126 (1991) 61
Structural analysis of Japanese PWR steel containment vessel under internal pressure loading, T. Isozaki, K. Soda and S. Miyazono 126 (1991) 387

Structural design, construction methods and testing

Device for testing concrete under impact tensile loading and lateral compression, J. Weerheijm and H.W. Reinhardt 126 (1991) 395

Nuclear Safety

An assessment of eight void fraction models, B. Chexal, J. Horowitz and G.S. Lellouche 126 (1991) 71
STGEN computer program methodology and application to the steam line break tests in the RD-12 steam generator, A. Sharon, M.A. Grolmes, C.S. Kim and J.C. Luxat 126 (1991) 151
Phase distribution during gas–liquid flow through horizontal dividing junctions, J. Hart, P.J. Hamersma and J.M.H. Fortuin 126 (1991) 293
Use of expert judgment in NUREG-1150, N.R. Ortiz, T.A. Wheeler, R.J. Breeding, S. Hora, M.A. Mayer and R.L. Keeney 126 (1991) 313
Material redistribution in failing bundle structures under simulated severe FBR accident conditions, W. Peppler and H. Will 126 (1991) 403
